CITY SCHOOL SYSTEMS, 1919-20.

CONTENTS.—Comparative summary of statistics—School terms, teachers, and enrollment—Expenditures—Detailed statistics of school terms, teachers, and enrollment—Kindergartens—Evening schools—Health and recreation, junior high schools—Receipts—Detailed statistics of expenditures and outlays—Bonds, taxation, and property.

This report presents the statistics of city public schools for the school year 1919-20. The cities have been divided into five groups: Group I, including all cities having a population of 100,000 or more; Group II, cities having a population of 30,000 or more but fewer than 100,000; Group III, cities with a population of 10,000 or more but fewer than 30,000; Group IV, cities with a population of 5,000 or more but fewer than 10,000; and Group V, all cities having a population of 2,500 or more but fewer than 5,000. This classification is based upon the population as reported by the Bureau of the Census in 1910; the figures for 1920 were not available in time for use in this connection.

For all cities not reporting, careful estimates have been made in compiling the summaries by States and also the grand summary constituting Table 1. This report contains detailed statistics only for cities having a population of 10,000 or more. The statistics of the smaller cities, i. e., those having a population of 2,500 or more but fewer than 10,000, are not shown in detail, but a brief summary is presented in Tables 19 to 22, inclusive.

TABLE 1.—Comparative summary of school statistics for the three groups of cities of 10,000 population and over, 1919-20.

[The grouping of these cities is based on the United States Census of 1910. Group I includes 50 school systems; Group II, 141 school systems; Group III, 419 school systems.]
